

The Scientific Background of Avemar

Avemar has been recognised and studied worldwide since 1998. As *in vitro*, *in vivo* and clinical studies provided further evidence of its safety and effectiveness in the supplementation of oncological treatments, Avemar was registered as “dietary supplement for special medical purposes for cancer patients” in 2002. Avemar also gained the NutrAward for the “Best New Product of the Year” in California, USA in 2006 under the brand name AVE.

Since the discovery of Avemar pulvis, the active ingredient of Avemar, over 12 years of scientific study has been conducted to support its safety and effectiveness, including *in vitro*, *in vivo* and human clinical research. Most of the prestigious publications are also published at the PubMed database. For more information please visit: <http://research.avemar.com>

Natural support for cancer patients

Avemar is a truly remarkable natural compound that improves the effect of the conventional oncological treatments. Used parallel with the conventional cancer treatments Avemar also aids the recovery of cancer patients after various oncological treatments and reduces the side effects of conventional therapies.

The Avemar Official Site

What is Avemar?

Avemar is a dietary food for special medical purposes for the dietary management of cancer patients. Avemar contains Avemar pulvis, an all natural compound made from scientifically fermented wheat germ extract. Avemar is produced under GMP (Good Manufacturing Practice) from the highest quality wheat.

When is it recommended to take Avemar?

- Avemar is suggested for supplementing clinical oncological treatments (surgery, radiotherapy, chemotherapy, immunotherapy).
- Avemar is suggested to be taken before, during and after oncological treatments, uninterrupted, right after diagnosis of malignant disease.
- Avemar may be safely taken during any stage of the malignant diseases.
- Avemar can be taken alongside prescription medications.

Should I take tablet or granulate form of Avemar?

Avemar is available in film-coated tablet and granulate form. For diabetics, patients with fructose intolerance and for those who have difficulties consuming Avemar granulate, we recommend the tablet form.

Avemar Granulate

One box of Avemar contains 30 sachets, each containing 17g of granulate. To consume, mix Avemar with 100-200 ml of cold liquid and stir it well until the granulate has dissolved. Avemar granulate is flavoured with natural orange aroma and fructose.

Recommended Dosage: For adults with body weight of 90 kg or less, one sachet is recommended per day. For adults with a body weight greater than 90 kg 2 sachets per day, one in the morning and one in the evening.

Before consuming Avemar, please read the detailed user information!

Avemar Tablet

Each bottle of Avemar tablet contains 150 tablets. Avemar tablet does not contain any fructose or additional flavouring.

Recommended Dosage: For adults with body weight less than 50 kg four tablets twice a day. For adults with body weight between 50-90 kg five tablets twice a day. For adults above 90 kg seven tablets twice a day. It is recommended to take half of the daily dose in the morning and the other half in the evening. 10 tablets of Avemar are equal to one sachet (17g) of Avemar granulate.

Avemar does not replace or substitute any oncological treatment or drug!
